## Last Year Prediction: 2025

### Prediction:

*This year main theme is persistence, inflexible, irreconcilable, panic, weird, destroyed, high-end, rare and influential. So, we will see more objects or things being destroyed due to nature or man-made, never-ending war or major changes in leadership around the world.*

### Results:

In 2025, we saw a significant shift in leadership around the world. Firstly, we had Donald Trump serving his 2nd term starting on Jan 20, 2025. Then there was a big political scandal in South Korea where President Yoon Suk Yeol declared martial law and was subsequently impeached and removed from office in Apr 2025. Then we had Sanae Takaichi, the first female Prime Minister of Japan, assume office on Oct 21, 2025. In Germany, we had Friedrich Merz, and in Austria, Christian Stocker, taking over as Chancellor.

### Prediction:

*The conflicts around the world like Ukraine war, Israil vs Hamas, South China Sea conflicts and trade war will continue throughout 2025 and will probably see some form of improvement towards the end of 2025.*

### Results:

The Ukraine war is still ongoing, with Donald Trump trying to mediate to end the war. The Israel vs. Hamas war is currently under a ceasefire effective Oct 10, 2025. There was a major military conflict between Thailand and Cambodia, which started on May 28, 2025, and an officially signed peace accord on Oct 26, 2025. Regarding the big fanfare by Donald Trump on the tariff war with the rest of the world, which he started when he assumed the presidency of the US, it has now gone to the state of limbo where he flip-flops between tariffs being imposed.

### Prediction:

*There is sign of major illnesses happening worldwide (similar to Covid-19). So, there might be new outbreak of Covid-19 or there might be new illness happening.*

### Results:

In 2025, there were major outbreaks of Measles, Cholera, and Dengue around the world. There were 1,753 Measles <sup>1</sup>cases in the U.S. as of November 2025, compared to 285 cases in all of 2024. Reports from WHO <sup>2</sup> state that there were over 562,449 cases and 7,201 deaths globally as of late October 2025, which is a significant increase in cases and more than double the deaths compared to the same period in 2024.

<sup>2</sup> <https://www.who.int/publications/m/item/multi-country-outbreak-of-cholera--external-situation-report--31-29-october-2025>

The European Centre for Disease Prevention and Control<sup>3</sup>, in its November 2025 report, stated that since the beginning of 2025 and as of October 2025, over 4.5 million dengue cases and over 3,000 dengue-related deaths have been reported from 103 countries/territories in the WHO Region of Europe (EURO), the Regions of the Americas (PAHO), South-East Asia and West Pacific Regions (SEARO and WPRO, respectively), in the Eastern Mediterranean WHO Region (EMRO), and in Africa.

#### **Prediction:**

*The projected economy is not as-expected and a few major companies are registering misses in target. Although, US is expecting to have a few interest rate cuts but this is not helping the global economy as a whole. In fact, we expect that there might be some big major companies going into difficult financial situation.*

#### **Results:**

Towards the end of 2024, there was a lot of speculation that there will be 4 to 6 cuts happening in the first half of 2025. However, the first rate cut in 2025 only happened in Sept 2025.

As for the projected economy, the IMF, World Bank, and European Commission reported the following:

- IMF<sup>4</sup> (Global GDP Growth: Oct 2025) projects global growth to slow to 3.2% in 2025, a significant downgrade from initial pre-policy-shift forecasts, indicating the economy did not meet earlier expectations.
- World Bank Growth Outlook<sup>5</sup>: Global GDP growth for the entire 2020s decade would average just 2.5%, the slowest pace of any decade since the 1960s, reflecting a protracted weakness.
- European Commission<sup>6</sup>: revised the Eurozone's 2025 GDP growth forecast down to 0.9% from an earlier projection of 1.3%.

S&P<sup>7</sup> 8] Global Market Intelligence reported that:

- In the first half of 2025 (1H 2025), there were 17 mega bankruptcies (companies with over \$1 billion in assets), marking the highest half-year total since 2020.
- Over the 12 months leading up to mid-2025, 117 large companies (assets over \$100 million) filed for bankruptcy, a rate 44% higher than the 2005–2024 historical average.
- Major bankruptcies or high-profile restructurings were recorded across consumer-facing and industrial sectors, including retailers (e.g., Forever 21, Hallmark), casual dining (e.g., TGI Friday's, Red Lobster), and healthcare providers (e.g., Prospect Medical), citing high debt burdens and persistent inflation.

### Prediction:

*The share market will remain volatile with high ups and downs happening throughout the year.*

### Results:

According to the report from St. Louis Fed Analysis on 2025 Volatility<sup>8</sup>:

Period	Event Details	Index Movement
<b>Early 2025 Downturn (Feb-Apr)</b>	Triggered by new U.S. tariff policies and trade war fears.	The S&P 500 narrowly avoided a bear market (a 20% decline) in early April. Within a two-day span in April, the S&P 500 lost 10% and the Nasdaq lost 11%.
<b>Mid-to-Late 2025 Swings</b>	Driven by uncertainty over AI valuations, persistent inflation, and unclear signals on the pace of Fed rate cuts (as evidenced by a brutally volatile week in November).	The market repeatedly rallied to record highs, only to suffer quick corrections, such as the <b>S&amp;P 500 posting a 2% weekly loss</b> in late November despite hopes for Fed easing.

### Prediction:

*The job market remains in limbo state where some major companies will continue to retrench staff.*

### Results:

According to Challenger, Gray & Christmas (October 2025 Report)<sup>9</sup> :

Metric	Statistics (up to Oct 2025)
<b>Total Announced Job Cuts (U.S.)</b>	<b>Over 1.1 million</b> jobs cut through October 2025. <b>Highest total since 2020</b> (a 65% increase from the same period in 2024), confirming a severe period of retrenchment.
<b>Technology Sector Cuts</b>	Over <b>141,000</b> jobs cut in the tech sector. A <b>17% increase</b> from the same period in 2024, showing that the wave of layoffs from major global tech players is accelerating, not slowing down.
<b>Retail Sector Cuts</b>	<b>88,664</b> jobs cut in Retail. A <b>145% increase</b> from the same period in 2024, demonstrating the severe financial strain on consumer-facing businesses globally.

Tata Consultancy Services (India)	<b>12,000</b> Jobs cut. Announced its biggest layoff ever, targeting mid- and senior-level employees as part of a strategic shift toward <b>AI-driven efficiency</b> .
Panasonic (Global)	<b>10,000</b> Jobs cut. Global cuts planned for operational efficiency and organizational optimization.
UPS (US and Global Ops)	<b>20,000</b> Jobs cut. Major cost-saving plan and facility closures following a slowdown in delivery volume.
Telefonica (Spain)	<b>6,000</b> Jobs cut. Large-scale layoff plans across several units to reduce costs and enhance digital services.
Nissan (Japan)	<b>11,000</b> Jobs cut. Global restructuring and efforts to cut costs.
Amazon (Global)	<b>30,000</b> Jobs cut. Company pares expenses and compensates for over hiring during the peak demand of the pandemic
Microsoft (Global)	Approximately 9,000 in the July 2025 wave, following about 6,000 in May 2025, bringing the total to over <b>15,000</b> in 2025. The layoffs are a strategic move to control costs, streamline operations, and redirect resources towards AI infrastructure and development

#### Prediction:

*The weather will continue to be more erratic with major flooding happening in various countries.*

#### Results:

According to UN Disaster Risk Reduction (UNDRR) - GAR 2025 Report<sup>10</sup>:

- Global Flood Occurrences: Floods and storms continue to account for the largest proportion of weather-related disasters, estimated to be 35–40% of all weather-related disaster occurrences in the UNDRR's 2025 analysis.
- Record Flash Flood Warnings (U.S.): The United States saw a dramatic increase in high-intensity rainfall events, with 2025 becoming the most flash flood-warned year to date, surpassing figures recorded since 1986. This highlights the erratic nature of rainfall—more intense, shorter-duration events.

## Year 2026

This year, 2026 is Bing Wu (丙午) Horse Year. The Horse year starts on 4<sup>th</sup> February 2024 at 04:01 hour. For Qi Men Dun Jia yearly prediction, we will be using the date and time of Chinese New Year Eve to plot the chart and perform the analysis. The main reason is that the human Qi during this time is strong as every Chinese will be celebrating the Chinese New Year. This is to be in line with the Heaven, Earth and Human concept (天时, 地利, 人和). This year, Chinese New Year occurs on 17<sup>th</sup> February 2026.

## This Year general Prediction

The Chinese New Year Eve chart as follow:

Unlike the last two years (2024 and 2025), where the Fu Yin chart indicated stagnation, lack of movement, or constancy, this year, 2026, will see drastic movement and changes in all aspects.

The year 2026 is forecast to bring drastic, volatile changes across key economic sectors, moving away from the relative stagnation of 2024 and 2025. This environment will create a sharp financial divergence, leading to both significant windfalls and widespread corporate distress.

The primary industries facing this massive upheaval are:

- **Property:** Will see a split between developers burdened by debt and high interest rates who will face failure, and firms specializing in data centres, logistics, and distressed asset acquisition that will thrive.
- **Education:** Traditional, slow-to-adapt institutions will struggle, while massive investment flows towards providers of AI-integrated training, micro-credentials, and in-demand technical skills.
- **Agriculture:** Erratic weather and climate extremes will lead to crop failures and losses for conventional farms. Success will be captured by companies pioneering precision agriculture, climate-resilient seeds, and controlled-environment vertical farming.
- **Medical:** Volatility is driven by the high cost of rapid innovation. While breakthroughs in genomic medicine and advanced diagnostics will attract huge capital and create fortunes, older, non-innovative healthcare systems will face severe financial strain.

In essence, 2026 will aggressively differentiate between businesses that embrace **technological and structural change** and those that resist it.

President **Donald Trump** is expected to maintain his strategy of using trade wars as a primary tool for negotiation. His policy will be characterized by continued **volatility, involving frequent and unpredictable shifts** between extreme tariff rates as a means to extract concessions from global partners.

The year 2026 is expected to see an **increase in the deliberate destruction of critical infrastructure** by human actors—a strategy likely fuelled by geopolitical tension and conflict. This calculated destruction will not only escalate the severity of **ongoing wars by targeting essential energy, communication, and transportation networks** but also raises the risk of **new conflicts emerging**. The vulnerability of such systems, coupled with intensified political instability, makes critical infrastructure a primary non-military target, amplifying both kinetic and asymmetrical warfare globally.

The year 2026 is anticipated to be marked by **increased political instability globally**, with a rise in the number of major international leaders becoming embroiled in **scandals** or facing intense pressure from difficult political and economic situations. This trend points toward a year of widespread leadership turmoil and accountability crises, potentially triggering early elections or major shifts in governmental power as public trust erodes.

The global pandemic situation is anticipated to see a **significant and positive turning point** in 2026. Major disease outbreaks are expected to be brought under control, indicating increased efficacy of global health surveillance, advanced therapeutics, and widespread vaccination efforts. This improvement should lead to a stabilization of public health systems and a reduction in the severe economic and social disruptions experienced in recent years.

The **job market** in 2026 is forecast to remain **highly volatile**, characterized by sustained periods of major retrenchments and structural correction. Companies will increasingly use **Artificial Intelligence (AI)** as a strategic lever—simultaneously using efficiency gains as justification for shedding existing roles while aggressively hiring for specialized staff needed to build and manage new AI infrastructure. This dual action will lead to a severe skills mismatch, creating a constant churn of layoffs and targeted recruitment, thereby maintaining instability.

The year 2026 will see the **erratic nature of global weather patterns intensify**, driven by underlying climate factors. We anticipate a continuation of extreme meteorological events, including severe, high-intensity flooding in various regions, juxtaposed with periods of intense, record-breaking heatwaves during the summer. Furthermore, abrupt shifts into unexpected periods of cold will also occur, making seasonal planning difficult and placing increasing strain on global agriculture and infrastructure.

The year 2026 is designated as a Bing Wu (丙午) year, characterized by the extremely potent elemental configuration of **Fire (Bing) over Fire (Wu)**. This amplification of the Fire element signals an environment dominated by intense energy and volatility. We should anticipate extreme heat during the summer months, significantly increasing the frequency and intensity of forest fires and leading to more instances of property destruction. Furthermore, the Fire element governs the heart; consequently, this strong energy suggests a concerning spike in cardiovascular health issues, including heart diseases and stroke, particularly affecting individuals associated with Group 9 (Gui)

## Individual forecast

The Qi Men Dun Jia forecast differs from other animal year forecasts because it relies on the "Heavenly Stems" or Heaven Qi for predictions. Please refer to the following table using your year of birth to determine your group and read the prediction accordingly. The grouping is based on the ending year. For example, individuals born in 1935, 1945, 1955, etc., will be classified under Group 1.
